DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Amendment filed February 22, 2008.

Allowable Subject Matter

2. Claims 2, 4, 6-12, and 14-23 are allowable over prior art.

The following is an examiner's reason for allowance: Although prior art teach electronic entities for carrying out transactions, the above identified prior art of record, taken alone, or in combination with any other prior art, fails to teach or fairly suggest the specific features of claims 2, 4, 6-12, and 14-23 of the present claimed invention. Specifically prior art fails to teach the residual charge being at least in part representative of a time elapsed since a first transaction and furthermore fails to specifically teach fraud being detected by the time elapsed between the first transaction and the new (second) transaction. Prior art additionally fails to teach the electronic entity including at least two subsystems including at least two capacitive components having different leaks across their respective dielectric spaces and the electronic entity further including a means for processing measurements of the respective residual charges to extract from the measurements information substantially independent of heat input to the entity during the time elapsed between two transactions. The above limitations are not disclosed in prior art and moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
